#### 15. PERFORMANCE REVIEW

# (a) Current quarter compared to the corresponding quarter of last year (3Q'15 vs 3Q'14)

For the third quarter ended 30 September 2015, the Group achieved sales revenue of RM 41.6 million as compared to sales revenue of RM 48.9 million for the corresponding quarter last year. The sales decline of approximately 15% were attributed to: a) the phasing out of specific mobile phone accessories resulting in sales contraction and b) the transfer of specific models of network camera business to North America towards the end of last year by our customer for corporate reasons resulting in a loss of sales revenue which have yet to be fully off-set by new business of an equivalent quantum in the same business segment.

On the other hand, the Group experienced a strong surge in demand for electronic headlamps, floor-care products, health-care devices and other consumer electronic lifestyle products which, however were not enough to make up for the preceding causes of sales shortfall. Nevertheless, the rising trend in the preceding business segments augurs well for long term business growth.

The Group registered profit attributable to equity holders of the parent company of RM 4.3 million as compared to the same of RM 3.1 million for the corresponding quarter last year. The significant jump in profit of 39% despite the sale decline was mainly attributed to productivity improvement, cost reduction exercises implemented, product mix bearing higher margins and the strengthening USD.

# (b) Current quarter versus the preceding quarter (3Q'15 vs 2Q'15)

Sales revenue for the third quarter ended 30 September 2015 at RM 41.6 million was 10% higher than the preceding quarter of RM 37.9 million. The sales increase was particularly contributed by the increased demand for mobile phone accessories and network cameras. Sales of health-care products, electronic wearable gadgets, floor-care products and other consumer electronic lifestyle products boosted the sales increase.

The Group registered profit attributable to equity holders of the parent company of RM 4.3 million as compared to the same of RM 2.5 million in the preceding quarter, representing a 72% increase in profitability. The significant profit improvement was due to increased sales, product mix bearing healthy margins and the strong USD aiding profit sustenance.

#### 15. COMMENTARY ON PROSPECTS AND TARGETS

Sales continued to scale upwards quarter-to-quarter over the last 3 quarters which is in accordance to the Group's normal business cycle. Cumulative sales for the initial 9 months of the year ended 30 September 2015 clocked in at RM 112.2 million against the same of RM 131.9 million for the same period last year. This represented a decrease of 15% which was mainly caused by the loss of some network camera business towards the end of last year which have yet to be made up, although sales in other segments posted growth which, however, was not sufficient to off-set the specific business loss. Nevertheless, the Group is pursuing for more replacement business in the network camera space.

The prospects in the health-care/medical devices, electronic wearable products, automotive aggregates, industrial products, robotic vacuum cleaners and other consumer electronic lifestyle products look promising as we continue to work towards securing some of these businesses in the next few quarters. The Group continues to face headwinds in the mobile phone accessories segment, similar to what has been reported in the last quarter. In this respect, we continue to see the global mobile phone OEMs step-up their pricing war to defend their turf against a rising tide of very competitive, up and coming mobile phone OEMs from China such as Xiaomi, One Plus and Oppo.

### 15. COMMENTARY ON PROSPECTS AND TARGETS (Cont'd)

For the rest of the year (2015), we expect the global economy to remain volatile and lackluster. We still foresee the major economies of Europe, China and Japan facing headwinds in maintaining GDP growth while US maybe expected to do better but remains uncertain. Nonetheless, the Group shall rely on its management experience and technical expertise to navigate through such volatile and challenging times, in an effort to grow our business.

The Group's profitability has been on a bullish rising trend over the last 3 quarters of 2015. Cumulatively, it registered profit attributable to equity holders of the parent company of RM7.4 million for the initial three quarters ended 30 September 2015 against the same of RM 8.5 million for the same period last year. Moving forward towards year end, it will strive and expect to deliver satisfactory profit.

It will continue to be prudent and will follow through with its cost reduction exercise, expense/overhead control, productivity improvement, business risk mitigation and sales price management. The strength of the USD, which we anticipate to continue for the rest of the year will work in favour to the Group's business.
